Quantum Fiber – Instant Internet

Let's get started

1. While in your home, turn on the WiFi of your smartphone or computer.
2. Connect this device to the WiFi by using the Network Name and Password located on your utility panel or modem.
3. Once connected to the WiFi, open your web browser and navigate to <http://activate.q.com> or scan the QR code to sign up.
4. Connect each of your smart devices using the network name and password from Step 2.

Although our fiber service usually means 100% fiber-optic network to your location, in limited circumstances Quantum Fiber may need to deploy alternative technologies coupled with a non-fiber connection from a certain point (usually the curb) to your location in order to provide the advertised download speeds.

Customer speed experiences will vary, particularly when accessing the Internet wirelessly from various devices. Download speed via a wired connection. Internet speeds are not guaranteed due to conditions outside of network control, including customer location, devices, equipment, and access through a wired or wireless connection; see www.q.com/legal for more information.

Service is not available everywhere. Available to qualifying customers residing in eligible multi-dwelling units. Month-to-month (referred to as "no contract") service means no term commitment and may be cancelled at any time without an early termination fee but customer must accept Internet Subscriber Agreement prior to using service (see www.q.com/legal). Quantum Fiber may change, cancel, or substitute offers and services, or vary them by service area, at its sole discretion without notice. All products and services listed are governed by tariffs, terms of service, or terms and conditions posted at www.q.com/legal. Additional restrictions may apply. © 2023 Q Fiber, LLC.
